

Core Continuous Energy Improvement

Take control of your energy costs

Significant, long-lasting savings can be achieved by making simple, everyday changes. That's what Entergy Solutions' Core Continuous Energy Improvement (Core CEI)* offers: With low- and no-cost upgrades and with our expert guidance and support, we can help you to identify energy waste at your place of work – and put a stop to it.

Typical recent savings

Office:

- **Saved: \$2,133** in energy costs and **21,325 kWh**
- **Projects completed:** Evening setbacks, Building Automation System (BAS) tuning

Small manufacturing:

- **Saved: \$2,977** in energy costs and **29,772 kWh**
- **Projects completed:** Engineered nozzles, turning off idling equipment during off-hours, removing unnecessary lighting, repairing outdoor lights that were on during the day

Grocery:

- **Saved: \$16,916** in energy costs and **169,156 kWh**
- **Projects completed:** Removing unnecessary lighting, repairing outdoor lights that were on during the day

Private school:

- **Saved: \$1,677** in energy costs and **16,773 kWh**
- **Projects completed:** Programming thermostats, removing unnecessary equipment

Retail:

- **Saved: \$1,425** in energy costs and **14,254 kWh**
- **Projects completed:** Programming thermostats, turning off lights after hours

In addition to these savings, **incentives of up to \$4,250** are also available, depending on your upgrades and provider.

How it works

With the help of our team of experts, you can move your company's culture toward sustainability by reducing energy costs and greenhouse gas emissions. Program participants often reduce energy use and utility costs, improve comfort and efficiency, and increase awareness of energy use. Collaborative workshops, coaching and professional guidance help each facility set a new standard. **That's the power of Core CEI.**

*For SWEPCO customers—also served by our team—"Continuous Energy Improvement" is referred to as "Strategic Energy Management."
