

BUSINESS PROGRAMS

Agricultural Energy Solutions

The Agricultural Energy Solutions program provides financial incentives and technical assistance to help agribusinesses replace aging, inefficient equipment and systems with new, energy-efficient technologies. From poultry house VFD fans to irrigation pump upgrades and more, the program is designed to maximize savings through increased energy efficiency and better-managed energy costs.

entergyarkansas.com/agriculture or 501-435-3010

Agricultural Irrigation Load Control

This optional program allows Entergy to manage the load on the distribution grid during the peak summer season by switching off your irrigation pumps, using cellular-enabled load control devices. This technology also allows customers to monitor and operate their own well pumps from any computer or mobile device. By allowing Entergy Arkansas to turn off your pumps during times of high energy demand, you can help keep rates low for everyone and even receive a rebate check for participating. Call or email today to add your pumps to the program and start receiving your rebate checks.

Small Business Smart Direct Load Control Program

Entergy Arkansas is helping small businesses, churches, schools and more save energy and money the smart way. Get free smart thermostats, optimize your business's HVAC system and earn money each year. During a few hot days in the summer, your thermostat's setpoint will be temporarily increased to help relieve stress on the power grid. Enroll and get additional incentives.

Why use Entergy Solutions?

Entergy Solutions programs provide energy-saving enhancements to Entergy Arkansas customers.

Whether you are a residential or business customer, the Entergy Solutions programs are here to help. From energy audits and home weatherization upgrades to thermostat and equipment enhancements, Entergy Solutions provides a wide variety of benefits to all customers.

If you have questions or want to discuss our programs, you can visit our website, email Entergy Solutions directly or get in touch with our program staff at the phone numbers and email addresses listed with each program. EntergySolutionsar.com | EntergySolutionsInfo@entergy.com

Residential programs

The Entergy Arkansas Entergy Solutions residential programs help you save energy in your home. Services and products like a home energy audit, duct sealing, air sealing, A/C or heat pump tune-ups, power strips, smart thermostats and more are available at no additional cost.

Home Energy Solutions

The Home Energy Solutions program helps you address common inefficiencies with your home. Services may include duct sealing, air sealing, high efficiency A/C or heat pump tune-ups, and other items such as smart thermostats. This Entergy Solutions program uses a network of authorized trade allies to deliver energy efficiency upgrades and products and provides incentives in the form of savings off your work invoice.

HomeEnergySolutionsEAL@icf.com or 866-627-9177

Manufactured Homes

If you are a manufactured home property manager or resident, Entergy Arkansas provides incentives to fix air leaks in manufactured homes and their qualifying central HVAC duct systems.

The program also offers funding to clean and adjust your central air conditioner or heat pump to make sure it is running as efficiently as possible. These measures, along with more efficient water-saving and lighting products, can help lower your energy usage.

ManufacturedEAL@icf.com or 866-627-9177

Multifamily Homes

Energy efficiency upgrades will add value to your property by lowering energy usage, as well as water and sewer usage for tenants. Entergy Arkansas can install no-cost energy-saving products in eligible multifamily properties and offer incentives for A/C tune-ups and duct- and air-sealing measures.

MultifamilyEAL@icf.com or 866-627-9177

Low-Income Solutions

For qualified customers, the Low-Income Solutions program offers all the benefits of Entergy Arkansas' residential Energy Solutions program for no out-of-pocket cost. Whether you live in a manufactured home, a site-built home or an apartment, you may qualify for this program.

RESIDENTIAL OFFERINGS

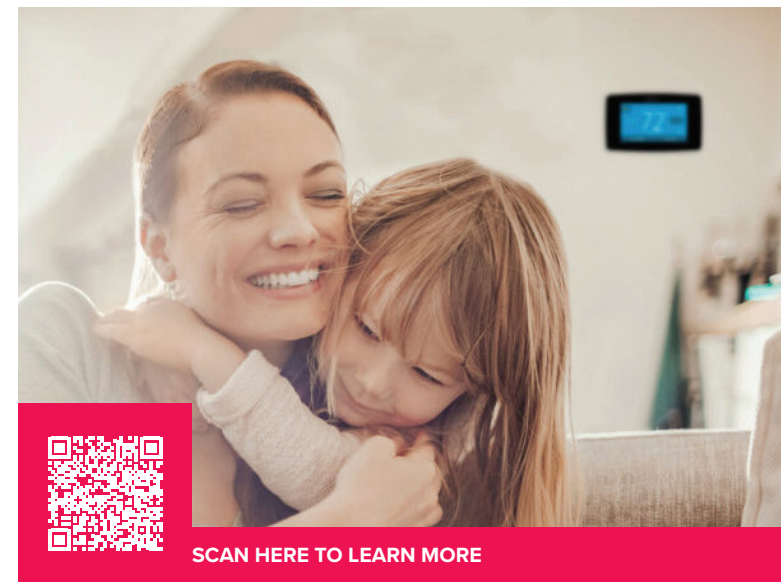

Residential Point of Purchase Solutions

Entergy Arkansas residential customers can receive discounts for smart thermostats and select appliances purchased through local retailers. Discounts are applied at the time of purchase for energy-efficient fixtures and weatherization products. Mail-in rebates are available for appliances such as high efficiency air purifiers, dehumidifiers, smart thermostats and freezers. Recycling is also available for old, working-condition refrigerators and freezers. Visit the Entergy Arkansas website for a list of rebates and participating retailers in your area or to schedule a refrigerator or freezer pickup. Also, look for the Entergy logo on store shelves where prices have already been reduced.

Summer Advantage Load Control

During the warmer months, higher temperatures usually mean your air conditioner and our power plants work overtime. That's why the Summer Advantage Program pays you to help Entergy Arkansas reduce its electricity demand in the summer by cycling your air conditioner or heat pump for a few hours. Your voluntary participation in the Summer Advantage Program will earn you annual cash rewards based on your participation.

Large Commercial & Industrial Solutions

Entergy Arkansas' commercial and industrial customers can receive incentives to upgrade the power-consuming equipment in their facility or for specifying high efficiency products and equipment in new construction plans. Common projects include lighting and HVAC upgrades, but the EAL Large C&I Team will consider almost any project that will save energy and may also be able to provide funding to investigate those opportunities.

EntergyARLargeCommercial@clearesult.com or 877-212-2420

Commercial Point of Purchase Solutions

This cross-market program is designed to provide fast, easy energy efficiency solutions for non-residential customers at the point of sale. A variety of efficient lighting products and commercial equipment are available at discounted prices through participating distributors. Upgrade your facility today, and start saving with lower up-front costs. Visit the Entergy Solutions website to download a participation agreement and find a distributor in your area.

Public Institution Solutions/CitySmart™

This program is designed specifically for public entities and schools. Customers eligible for CitySmart include, but are not limited to, city, state, federal and municipal buildings; K-12 schools; and universities. CitySmart program offerings are similar to the Small Business and Large C&I Solutions programs with the addition of optionally benchmarking your facilities against similar customers to identify inefficiencies and upgrade opportunities. Program staff are familiar with the budget and resource challenges faced by publicly funded entities and are available to help overcome those barriers.

Small Business Energy Solutions

This program offers strategies tailored to overcome the particular challenges small businesses face regarding internal resource allocation and access to capital. Program offerings are tailored to meet the needs of Entergy Arkansas' small business customers, generally those with less than 100 kW of connected load. The program provides audits to identify cost-effective efficiency retrofit opportunities as well as financial incentives and other services to encourage early replacement of existing equipment with high efficiency alternatives. Find a list of participating trade allies in your area at the Entergy Solutions website, or contact the program staff by phone or email.
